## EDUCATION

---

**University of Ilorin**  
*Bachelor in Mathematics*

Ilorin, Kwara State  
*April. 2021 – June 2025*

## EXPERIENCE

---

**Trend Technologies**

June 2023 – March 2025

*Tutoring Application*

*Ilorin, Kwara State*

- Maintained and improved a tutoring platform built with React, HTML, and CSS
- Delivered responsive interfaces used across course pages, tutor profiles, and content sections
- Built and refined UI components for course catalog and testimonials improving content clarity
- Streamlined user flow from course discovery to tutor contact increasing engagement
- Optimized rendering performance and reduced UI inconsistencies across pages
- Refactored components improving maintainability and development speed
- Collaborated on feature updates including course structure, scheduling layout, and content organization

## PROJECTS

---

**Expensio - Expense Tracker** | *Next.js, TypeScript, PostgreSQL* | GitHub | Live

- Built full-stack expense tracking app with authentication and dashboard
- Implemented budget and expense system for tracking financial activity
- Integrated PostgreSQL database using Drizzle ORM
- Visualized financial data using charts improving user insight
- Designed responsive dashboard for desktop and mobile users
- Handled authenticated user sessions and protected routes for secure data access

**Meetly - Video Conferencing Platform** | *Next.js, TypeScript* | GitHub | Live

- Developed real-time video conferencing platform using Stream SDK
- Implemented meeting scheduling, joining, and recording features
- Built secure authentication system using Clerk
- Managed application state using Zustand for real time updates
- Designed scalable UI for complex interactive flows

**Google Clone - Web & Image Search Application** | *Next.js, TypeScript, Tailwind CSS* | GitHub | Live

- Developed search interface supporting web and image results
- Integrated Google Custom Search API for real time queries
- Implemented Google OAuth authentication using NextAuth
- Built pagination system to handle large result sets efficiently
- Designed responsive UI with theme switching

**Moviq - Movie Discovery Application** | *Next.js, TypeScript, Tailwind CSS* | GitHub | Live

- Built server-rendered movie platform using Next.js App Router
- Integrated external API with optimized data fetching strategy
- Implemented dynamic routing for scalable content delivery
- Improved performance using server-side rendering
- Designed responsive UI with theme support
- Leveraged server-side rendering to improve SEO and initial load performance

## TECHNICAL SKILLS

---

**Languages:** HTML, JavaScript, TypeScript

**Frameworks:** React, Next.js

**State Management:** React Hooks (useState), Zustand, Jotai, Redux

**Databases & Backend:** PostgreSQL, Supabase, Firebase, Drizzle ORM

**Developer Tools:** Git, Docker, Github, Postman, VS Code

**Styling:** CSS, Tailwind CSS
